

Shower Mixer

FSM5

TECHNICAL SPECIFICATIONS

Suitable for All Pressures

Minimum Pressure = 35kPa

Maximum operating Pressure = 500kPa

Maximum operating Temperature = 65 deg. Celsius

For domestic use only. Only slide showers that are equipped with a large internal bore hose and open flow one function handset will work effectively with this shower mixer. We recommend the FSL8 MonoJet slide shower for optimum performance.

CONFIGURATION

Mains Pressure systems Remove the insert from the cold side marked with a 'C'.

Unequal Low Systems Install as supplied.

Equal Low systems Remove the valve inserts from both inlets, prior to installation.

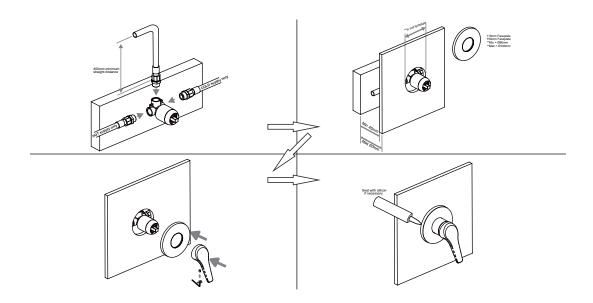

INSTALLATION

For pressures exceeding 500kPa install a pressure reducing valve. Failure to do so may void the warranty.

- See diagram overleaf.
- NB: Where back flow prevention is required, install our Back Flow Prevention Valve (part FORPT79) at the supply elbow hose connection of the handpiece.
- Shower mixers must be water tested with the outlet open, to prevent damage to cartridge seals; due to back pressure.
- Turn on water supply. Check for leaks.
- Any water seepage ex- the cartridge cavity opening can be stopped by retightening the large brass retaining nut.

Plumbers Note: Do not pressure test this mixer under static pressure.

WARRANTY

Please refer to our website for warranty information: www.foreno.co.nz/warranty

In the unlikely event that this product fails during its warranty period, phone our Customer Service team immediately on 0508 FORENO (0508 367 366) – as unauthorised removal of the product may void the warranty.

CARE AND MAINTENANCE

Chrome-plated finishes should not be cleaned with astringent, abrasive or citric cleaners. A soft, damp cloth is recommended for cleaning. Mild soap solutions can also be used on occasion.
