X-Factor Floor Standing Bath Mixer XFCFB

9 421009 518654

Congratulations on your purchase of this high quality product from Foreno Tapware.
Please read the following before installation and retain (along with your receipt) for future reference.

TECHNICAL SPECIFICATIONS

Suitable for Mains Pressure only

Minimum Pressure = 150kPa

Maximum operating Pressure = 500kPa

Maximum operating Temperature = 65 deg. Celsius

For domestic use only.

CONFIGURATION

Mains Pressure systems Install as supplied.

Unequal Low Systems Not suitable.

Equal Low systems Not suitable.

IMPORTANT NOTE

- Maximum recessed depth of the base plate is 70mm (or 100mm to the top of the floor). This allows for the necessary stand pipe thread clearway.
- Ensure that the base plate is level when fitted to the floor joist or within the concrete recess.
- Ensure the base plate is securely bolted to the joist within a wooden floor installation, not screwed.
- Ensure that the connecting inlet and outlet fittings are rigid on the base plate before installing the stand pipes.

INSTALLATION

For pressures exceeding 500kPa install a pressure reducing valve. Failure to do so may void the warranty.

- Fit the base plate within the floor recess (noting points above), allowing for access to both inlet connections.
NB: The distance is 150mm centre to centre between hot (left) and cold (right).
- Drill 35mm diameter holes (150mm centres) within the flooring for the chrome stand pipes.
- Screw the stand pipes all the way to the thread end.
- Slide the chrome decorative pipe covers on the stand pipes.
